Comments: I am glad to see the USFS is taking shooting more seriously. This has been a major issue for a long time. I own a home in Westcreek lakes not far from the Turkey Tracks shooting range and I have some follow-up questions I hope you can answer.

-what year was the Turkey Tracks Shooting Range opened?

-will the TT range be expanded in size or what is allowed to be shot with this plan?

-what changes are planned specific to this range such as more patrols, noise control, etc.

The range is a major problem for the community due to noise, danger and the NUMEROUS fires that have started there. I am disappointed this range will be allowed to continue as it seems to violate all your new standards in your document. But, if you are going to increase patrols and get the trash, nighttime shooting and fire danger under control that will help.
