Comments: Oil and Gas Leases

Re: WRNF Oil and Gas Leasing Draft EIS

Dear Mr. Fitzwilliams and Land Managers,

Please implement plan B, and provide strong regulation governing the development of existing leases to mitigate damage to the fragile eco-systems in this unique area.

As you know we are experiencing an extreme drought here in western Colorado. Water is so important to our region. We can survive without gas exploration. However, there is no survival for any life forms without the existence of clean water. On this basis alone, I do not think anything should be done to compromise existing wells, springs and irrigation rights, wildlife and ranching habitats.

I so appreciate being able to voice my opinion on this issue. Thank you for your thoughtful consideration.

Sincerely,

Cindy Perry
