Comments: Comments on WRNF DEIS leasing plan

To the U.S. Forest Service

I urge the Forest Service to place all roadless areas off limits for new leasing!!!

Please protect the beautiful White River National Forest.

The Citizens of this Country are struggling with the lack of concern over the negative impacts of drilling and the fact that no agency has the ability to regulate these companies in a manner that protects the water, the wildlife and US. The ramifications of long term effects should not be overlooked in the pursuit of economics. Some things aren't valued until they no longer exist.
