Comments: Water is Life : No Toxic herbicides in our watershed and forests

Dear Maria T. Garcia,
It has come to my attention that the USFS wants to
implement herbicidal weed/pest control despite EIS and
public opposition.

"The 13 herbicides the Forest Service proposes to use in dozens of watersheds throughout both forests (including Mora, Taos, Las Vegas and numerous others) have known health risks. Some of these chemicals have been banned by entire nations, and even in the Pacific Northwest United States." La Jicarita News

Water is Life. It is now time to think and act wisely.
Do not poison our watershed and our forests.
At the very least do not do this for your own children's health !
Thank you,
Ms. Mondragon
