Comments: Fwd:pubilc comment on federal register DSEIS for the Invasive Plant Control Project; Carson and Santa Fe National Forests

goats eat weeds and in a short time too. dont bring in grazing. those cattle bring on climate change. we need to cut down on cattle. the cattle ranchers are sordid cheap leaches since they pay so little for use of our national lands. they are leaches. they are robber barons making themselves rich and oiur land destroyed.
ban herbicides. ban all burning, which releases fine particulte matter which enters human bodies and causes lung cancer, heart attacks, strokes, allergies pneumonia and asthma, among other illnesses and deaths. that fine particulate matter travels hundreds of thousands of miles killing people all along the weather path. please send a paper copy to 2 glenway dr flemington nj 08822. this comment is for the public record. please acknowledge receipt. jean public
