Title:

Comments: For the Administrative Record, I submit that on 4/2/2021, the Forest Service reorganized the Plan documents and added a number of documents related to the Heber Wild Horse Territory Draft Management Plan. This process is difficult enough for the General Public without the Forest Service making it even more difficult by juggling and adding documents 10 days after they opened up the comment period. Also, the CARA system has been unreliable when trying to submit comments, requiring multiple attempts before they will go through, discouraging public comments.
