Comments: For the Administrative Record, I am now submitting the terrain photos I took of the canyon walls within the Heber Wild Horse Territory. These photos go with my comment on why the wild horses are not using their designated territory.

I am having to submit the terrain photos as a separate document due to the CARA system kept erroring out when I tried to submit them with the written narrative, although the total file size was well within the acceptable total file upload size limit. This is document attachment number 2 of three total documents connected with my comment re: why the wild horses are not using their designated territory.
