Comments: Applications for Permit to Drill (APD's) in the Sespe Oil Field

Dear Mr. Schwartz:

Please insist upon a thorough environmental impact before approving such a potentially damaging process for this sensitive area.

In a severe drought, using precious water to enhance oil production is not feasible.

No one still knows what how fracking affects porous formations or if our water reserves will be polluted for years to come. This is not the time to approve this until much more research has been done.

Carolyn McCleskey
