First name: Robin

Last name: Crawford

Organization: Heber Wild Horse Freedom Preservation Alliance

Title:

Comments: I hereby submit this information for the Administrative Record: I donot understand and I feel Forest Service has failed to recognize The territorial habit limits of the Heber Wild Horse herd , Historical documents and FS own surveys have concluded that the herd has and still to this day uses the entire Sitgreaves National Forest as thir Habitat. When it comes to AML, forage allocation and everything else related to this herd, the Management Plan should consider the Sitgreaves National Forest as the "territorial habitat" By law, these horses are to be considered "as an integral part of the natural system of the public lands". They were found throughout the Sitgreaves as of the passage of the Act, and they are found throughout the Sitgreaves even today. It is time for Forest Service to follow the law that they have ignored for the past 50 years , I feel that FS has catered to the cattle growers and totally ignored the laws set forth by the WFRHB Act . By illegal gathering and removal of horses throughout the last 50 yrs. Please find documents attached
