Title:

Comments: I am a fine art photographer who has been documenting the eastern Sierra for over 40 years. I write to ask this question: When is enough enough? Do we have to tear up every natural landscape we have, all so a very few people can make even more money? This makes no sense, as there are no more Hot Creeks available. Please, for the love of the natural world, the respect of the world beyond human influence, please reject this application for drilling. Thank You.
