First name: Celia

Last name: Carroll

Organization:

Title:

Comments: In opposition to the KORE mining project in the Eastern Sierra:

My three family members have fished and hiked the Hot Creek area since the 1970's. The state, many nonprofit organizations and local tourist-based businesses have kept this area in a mostly pristine state. The proposed mine would do great harm to the environment with traffic, heavy equipment, geological disturbance, and cause irreparable harm to one of the most scenic expanses of land in California.

Let's keep this area safe for other families in the future.

Please turn down the KORE application.

I took the attached photo of Hot Creek last November, near the Hot Creek Ranch.
