Comments: I am the caretaker/mining partner on the Pot Hole Placer. Gary Ellis is my mining partner and has given me full rights in decision making.

The only issue that I have with the proposed changes is with site 22.

That site obviously needs something done to make a safer access down to the camping spot below the road. I agree with that but I do NOT agree that it needs a road built down to the flat area and enough of a road to allow parking for vehicles.

Come on give me a break here.

There's is absolutely no reason for vehicles to be parking down there or on a road leading down there. That's going to make a bigger problem in my opinion.

Now I have been able to briefly talk to Jarod about this and he assured me that it's not a road being proposed but a walking path. That sounds pretty good, except your website says ROAD with parking for VEHICLES. Perhaps it's a TYPO or misunderstanding about the proposed changes.

A walk path using minimal space sounds like a good idea to me.

I have not been able to talk to Jarod more about this and I'm still waiting for him to return my phone call. I know that it's a busy time of year for him.

So this is my certified input and I respectfully request that NO road be built down to that camping spot at site 22.

Thank you and have a wonderful day.
