First name: Marvin

Last name: Adams

Organization: Yak Timber Inc.

Title: CEO

Comments: Thank you for the opportunity to comment. We are a wholly owned Native Corporation company operating timber harvesting in Yakutat, AK. We provide full timber employment to 26 full time seasonal employees. Our annual payroll is about \$1.5 million not including the hiring of 29 long shore-man/woman on each log ship loaded in port. I have had shareholders come up to me and state its been many years since they had a good Christmas in their household due the meaningful jobs that had been created. In Addition, Yak Timber had started a small mill operation to provide additional jobs in the community. We added four additional full time jobs. With respect to the potential timber sale, We ask that please measure carefully how much is going to be required for milling. This can make or break a timber sale. As a timber operator I would be reluctant to recommend any fix percentage or firm volume. I would leave it at the discretion of the successful timber bidder. I welcome this timber sale offering and I Hope the US Forest Services plans on many more timber sales well into the future. There are many good hard working Americans that need and depend on these jobs and meaningful paying jobs to support their families.
