Comments: As a Moab local I love to recreate in the LaSal mountains Spring//summer/fall. My outdoor activity is Motorcycling. A lot of my free time in the early summer months is spent up there trail clearing with a chainsaw. OHV riders and specifically Moto users are excellent at maintaining trails. Every time I travel to the mountains (lasal or Abajos) I carry my chainsaw to keep the trails clear of downed trees. The trails up there are great but we need more and better trails. There is only 1/2 of a days riding up there. Not only is there limited motorized single track[hellip] the single track trails that are up there on the trust lands[hellip] doesn't flow well. There need to be "loops" so that you don't have to out n back everything. I support the the LMP should keep the same ROS zones that it's had since 1986. Also The LMP should not discourage the management of motorized trails in IRA's, and I support the other four points made by local OHV groups including Ride with Respect on 12/18/2020
