Title:

Comments: Hello. Let me introduce myself. I am an orchid (*Calypso bulbosa*) sometimes called fairy-slipper or venus slipper. I thrive in the cool, moist humus of the spruce forest understory. I am sensitive to disturbance. Too much sun and I die. Too little moisture and I cannot propagate. To those humans who care about and appreciate nature, I am a treasure. Already uncommon, please do not make my survival even more precarious. Save the spruce forest from logging.
