Comments: On April 13 I submitted two separate 7 page documents on asbestos hazards: one document for the North Zone and one document for the Central Sierra Zone. I cut-and-pasted the documents into the Letter Text box. However the Letter Text removed all formatting, and made the comments difficult to read. In response, I am submitting the attached .pdf which preserves the formatting and adds page numbers. The attached .pdf is for the North Zone. I plan to submit the .pdf for the Central Sierra Zone tomorrow.
