Comments: I am just wondering how land owners will interact with the forest service. My land borders the national forest, and if teams need to thin the woods on my property to help take care of NF land, I'm anxious to do whatever is asked of me. I'll make coffee or carry ropes or whatever. That's all national forest behind the moose. I'm trying to get rid of dead stuff, but it's a lot of work for one guy.
