Title:

Comments: The last thing this beautiful area of the country needs is development. People have raised their families in this paradise, and in the world we're in, more buildings, more pollution, more energy, and more commerce is not necessary. People need a break from hustle and bustle. We need to preserve the land we have. We won't get another Earth, at least in our lifetime or our children's lifetime. Keep land pure if we can. One thing no one can buy is the experience of breathing fresh air in a place ones family has escaped to for years. Do not allow this! Please!
