Comments: Hello,

I am a resident of this valley and I also work in this valley. 98% of my time is between the missions and the swans. I am a forester for the state of montana at the Swan River Unit. I have just received a raise to \$55,000 a year, which feels like a good income. However, with these kind of expansions, I fear the common worker and resident is going to be driven out of the area. I feel like I have finally reached my dream job in such a special area and I'm going to lose it to multi-millionaires/billionaires. Please don't take away all of the special places for regular people. Whitefish is 90 mins away, Paws up less than 70 miles. Can't these places be enough?

Sincerely,

A hard working woman just trying to make a living
