Comments: I believe this increased infrastructure would harm montana environment in the area with increased population, pollution, traffic, litter, and noise. This is home many wildlife and endangered birds. The locals of the state love this area for peace quite and tranquility. I am ok with upgrades to existing buildings and possibly a few additional cabins but I feel the rustic charm has to remain. No modern buildings, no huge resort, no to commercializing and turning this area into a tourist destination that will ruin it. That would create many unwanted issues for state the people the area and peacefulness of all lands around it. Why allow this to be ruined to big business and celebrity for big money we don't need. Look at Glacier it's so bad that local people in their own state can't enjoy its beauty because of being over trafficked by tuorism.
