Title:

Comments: Our family has been hiking and recreating in this area for years, it's already a very crowded area with day use, adding more people to the area with pollution and crowding will disturb the natural beauty of this area! Can't we keep areas like this, wooded and less used!!! This will produce more out of state traffic, those who don't adhere to the bear aware policies, more injuries by animals! I'm begging for this to be rejected! Seeley lake won't even allow septic systems on their lake so that it preserves the lake, keeps pollution and toxins out of the land and water. Adding more septic, more food industries, more traffic will only compromise our SMALL Holland lake! Please consider all of this! Leave Holland lake, montana in general, ALONE!
