Comments: It is with great concern I am writing the Montana Forest Service. The thought of having one of the most naturally beautiful lakes in the state of Montana taken over by greed and hunger is truly disheartening. I have had countless memories at Holland Lake and couldn't imagine it being taken over by nothing but a profit driven corporation with no morals or cares as to how this would affect the people of Montana. If money and profit is why the forest service exists than I feel as though I have been lied to my entire life. I would hope the state of Montana and the forest service make the right decision and tell POWDR to kick rocks.
