Comments: The US forest service motto is "caring for the land and serving people". By allowing this expansion to ruin a fabulous place in Montana is unacceptable & not serving the people! I'm not convinced due process has been done properly. I was just there August 28th - I even inquired with the gentleman working at the lodge if there was anything for sale around there. He said it was all forestry & no private ownership also he was not aware of anything for sale. He neglected to mention that the lodge had ALREADY been sold to an out-of-state company... I heard of this proposed development last night from a video from a concerned Montanan saying public input has only until September 21st to voice comments with the US forestry. I am a native from Montana, I have many friends and family in the state, I have reached out to each and everyone of them and none of them have heard of this situation. Now with only less than a week to voice opposition... The US forestry service is completely being unfair to Montanans and people who love to come to Montana for the natural environment! Look what has happened with places like Bozeman, Kalispell and Whitefish! Stop this madness! I am in complete opposition of this expansion and especially for an out-of-state entity who only wants major profits & destroy our trees and the uniqueness that Montana is!
