Comments: I am very concerned about the size of the Holland lake Project. My Husband and I fish on Holland each year. We were told by the US Forest Service the boat ramp could not be upgraded because the creek close by was a spawning ground for bull trout. Did anyone do an environmental impact study on the environmental effects of the enormity of this project? If not, why not? If so, where is it?

The beauty and serenity of Holland Lake needs to be preserved!!

The gravel road to Holland from Hwy 83 can barely handle the current traffic. Who is going to pay for the upgrade to handle the new impact?

Please scale down this project or let the owner sell it to the US Forest Service. Upgrade the current buildings and let a contracted management company operate it like the National Parks.

Please Please don't ruin the small lakes of Montana that people come to for serenity!!
