Title:

Comments: I am against the destruction of the wild and pristine Holland Lake shoreline to accommodate the master development plan via POWDR. At the very least, an appropriate environmental impact assessment must be completed to understand how the flora and fauna will be impacted. Additionally, the residents of the Seeley-Swan area must have a say in how their community is developed. I most respectfully ask that you take their comments into consideration in this important decision and do your due diligence prior to granting a categorical exclusion. Thank you for the opportunity to comment.
