Comments: The redevelopment plan should be altered to incorporate the historic elements of the original resort. Mammoth is BOTH a premier ski destination AND a part of California/Eastern Sierra History. If this were Great Britain, the Hotel would be a listed building, preserved for future generations.

While it may be impractical to retain the Whole lodge, the core should be preserved; specifically, the Altitude 9000 bar/main reception component of the lodge. That modest component could be preserved, as it captured that early 50's/60's feel. The A-frame picture window perfectly frames the main slopes and the summit. To demolish this small gem would be unforgivable. And the intimate lodge reception, complete with leather sofas and fireplace, has unparalleled inviting warmth.

Please preserve at least this one modest bit from mammoth's origins.
