Comments: Good morning. I mapped these sinkholes before construction began. The Jefferson National Forest is bounded by sinkholes in Sinking Creek Valley. Please do not disturbed our JNF any more because the Mountain Valley Pipeline hops across sinkholes (see map attached) in Sinking Creek Valley before turning at a sinkhole and charging up the Sinking Creek Mountain to the blasted crest, where the project wants to enter the JNF. This bad project gets worse everytime we scrutinize it. Please Deny mvp an entry into the JNF. Please choose "No Action" plan to deny mvp any further destructive action in our National Forest. The middle of the mvp project is inappropriately routed through sinkholes and caves, which have already been impacted by construction and should be impacted further when the pipe is removed. The pipe must be removed from the mvp corridor and the ground restored, better than their plan. Thank you, Nan Gray
