Organization: Lake Mountain Allotment Permittee

Title:

Comments: To Whom It May Concern,

I received your letter regarding the Marsh Peak Allotment Boundary Adjustment environmental assessment. I support this project and believe it would improve the health of the Ashley National Forest rangeland in many ways, particularly by helping distribute cattle across the landscape. I feel that the Proposed Action (alternative 2) would be the most beneficial to the Lake Mountain Allotment. This alternative also minimizes potential negative impacts associated with large quantities of fences being constructed in the third alternative.

Thank you for taking the time to consider my comments.

Sincerely,

Caleb Taylor
