Title:

Comments: Now "50 trees" will be cut due to the development of a new ski trail, Blue Grouse Connector.

What is being done to mitigate the loss of those trees?

Does Ski Co have any negative consequences for destroying trees in the national forest?

These trees are habitats. What does Ski Co do to help the displaced ?

Aspen Trees are interconnected. Eliminating one may harm an entire system of Aspen Trees.

The evergreen trees also support each other if UNDERSTORY is correct. The evergreen trees are already stressed at this time by blights.

Please - no more destruction of currently healthy trees in Snowmass Ski area.
