Title:

Comments: We previously submitted Comments to the draft Environmental Analysis for the Bitterroot Front Project. Those Comments included reference to numerous articles which we had intended to include as electronic attachments, but at that time in the form they were in, those attachments would have exceeded the 200 MBs limit required (so we then planned on submitting them in a hard form to the Bitterroot Forest Service office in Hamilton the tomorrow). In the interim we have been able to determine how to include our pdf references as attached files. Therefore we are re-submitting our Comments with all of the attached references.
