Comments: This Area Map is great and makes sense. Expanding on the areas with very little to no use only makes sense. Any fake made up study trying to say habitat destruction in winter time is bogus and needs to be thrown out on the spot. I'm a true local and would like to keep these lands open to OSV with the true locals (not some outsiders bought and paid for nonsense opinion who doesn't even live here trying to shut it down). Giving back our wrongly taken lands will gain some of my trust back. Other comments in negative light of the current proposed plan as of 9/14/2023 (Screenshot attached for Proof) is a disgrace to our OSV rights on public lands. Thank you,
