Comments: Dear US Forest Service Members,

I am writing to you in order to use the opportunity to make a comment on the planned ski connection between the Big Bear Mountain (BBM) and Snow Summit ski centers. As you will learn in the attached text file, this won't be just a simple comment on the official plans. When I learned about the upcoming project, I was not surprised at all. To be honest with all of you, at the time I was working on the proposal concerning the complete reconstruction of the BBM Resort, I noticed the existence of Snow Summit and its slopes on the maps. Although I considered enriching my proposal with the possibility to create a direct ski connection, I eventually decided to leave the matter for later. However, it is true that the intended interconnection is hiding and indisputable importance in itself. So let me share my insights with you. All my ideas and visions are recorded in the document which I am attaching in PDF format. I usually draw a lot of ski trails, which only illustrates how many possibilities I can imagine in that particular case. The professional project designers can adjust the actual ski slopes to the form which will ensure achieving the best possible outcome. For better viewing, I have included all the drawings and the summary table with the estimated numerical specifications of the three connecting lifts from the second option separately, so that you can see the sketches and the table zoomed in. Thank you for this great opportunity to contribute to the preparation of such an amazing ski connection between these two beautiful Californian ski resorts. I am also willing to contribute my ideas to the next projects of a skiing nature, especially regarding the construction of new lifts. Thank you for such a great opportunity to share my ideas where they can really help.

Yours Faithfully

Daniel Holoubek

PS: The state of Alaska of course is not a valid information, but I struggled to submit so I tried everything to get it done. I apologize for that, I am submitting like this for the first time.
