Title:

Comments: Please do not designate the area above Lake Irwin at the top of the Robinson Basis as motorized. This area may not be reached legally except through passage at the very top of the northwest side where it is very steep and prone to avalanches. The road is currently in litigation and according to the Road Management Plan of 2010 may be blocked at landowners decision as no easement was given. This area was designated as motorized without consideration of private land in the area and without consideration of danger to the public's health. USFS does not staff the area properly keep people out during avalanche danger periods. A map is attached showing deaths in this area and demonstrates that the area may only be accessed through trespass or through an avalanche prone route. The USFS must obtain proper recreational easements and control the area or more deaths will occur.
