Comments: I wish clearcutting and all its related euphemisms described in this plan would be eliminated. I wish taking care of our forests looked more like it did when the native populations were the only residents and stewards of this land. I wish you would only allow removal of select dead and dying trees, or select thinning to promote existing growth, and select clearing of underbrush. I can't imagine what we'll be seeing from Sandwich Dome, Noon Peak, Mt. Israel, the Tripyramids, Mt. Chocorua and other neighboring peaks if this goes through.

There was a forest project that took place along 302 many years ago, somewhere between Bretton Woods and Attitash. It was beautiful. It was a healthy, thinned out forest.

That's what should be taking place here.

I feel like even though you say the revenue from timber sales is not the reason for this project, it actually is. And that is so sad.

Please reconsider for the peace and beauty of the region, and for the safety and wellbeing of the animals, birds, insects, reptiles who inhabit these spaces. Thank you.
