Title:

Comments: Regarding the Environmental Impact of logging on the recreational value of trails and other areas within the Sandwich Range, I respectfully disagree with the Forest Service's conclusion that there will be no impact. I believe that the attached "Before" and "After" photos vividly show that current logging practices will have a substantial, long-term impact on the visual aesthetics and the resulting important recreational value of the area.

Please put a halt to planned logging operations in the Sandwich Range.
