Comments: Attached are my comments regarding the e-bike proposal. I am opposed to expanding access to e-bikes, even level-1, as I think opening trails to this additional type of use will exponentially add to biker use and thereby significantly reduce hiker access, quality of experience, and safety; will degrade trails; add expense without sufficient budget; and be impossible to enforce. As a community, we need to be promoting the unique nature of the Greater Yellowstone ecosystem, not encouraging Jackson Hole as a recreational destination.
