Comments: Hello,

We have a home in Mi Wuk Village, and our cabin backs into the forest where the Rim Contingency Project from 2019 was planned. The Seral 2.0 project is a great initiative, and we completely believe forest management is overdue and required. However, we would like to understand if this project (Seral 2.0) replaces the Rim Contingency project? If not, then when will the Rim project begin as it is intended to provide a fire break for many homes along this ridge in Mi Wuk and beyond.

Thank you
