Comments: Dear BLM,

Thompson Divide is a precious habitat for wildlife and humans alike. The current COP 23 meeting of nations has confirmed that our world must get off our dependence on oil and gas.

The drilling sites are polluted and look like war zones, when they finally pull out.

Stop any development in the pristine Thompson Divide area. BLM works for "We The People" not the oil and gas companies. Do the right thing for our planet, our wildlife, and generations of humans to come. Photo is

Thompson Divide sunset taken from Missouri Heights.
