Comments: In summer 2017 I submitted photos of a large area, maybe 1/4 acre, of freshly cut young growth trees inside the Scapegoat Wilderness Area. The cut was located adjacent to an existing outfitter camp just South of the intersection of North Fork Blackfoot River and Dry Fork. Upon receiving the photos, my supervisor was surprised to learn of the new corral. Hopefully it is recorded in the yearly permit review documents, Outfitter Campsite Inventory, kept at Seeley Lake Ranger Station. Aerial photo attached.
