Comments: if you remove fixed anchors (used for safety) you should also remove trails, airplane fly-overs, access roads, bridges, irrigation projects (some over 100 years old) and climate change problems that decrease safety. Oh yes, and no more helicopter rescues.

I have seen all these in my 76 years in the mountains, and safety anchors are NOTHING in comparison to what you do today. (or do not do).

Look at the blasting you did here on "flat" ground. Safety- get real.
