Comments: I understand the Northwest Forest Plan is focused on 5 key issues that do not address the impact of humans illegally camping on our public lands, but I'd like to make a comment that this absolutely needs to be addressed with urgency. Humans Disregarding the 14 day stay limit is currently becoming a crisis that grows by the day, with trash, human sewage, drug use and paraphernalia, dumping oil and setting stolen vehicles on fire etc. is destroying the forests and we can no longer recreate because they are not safe. The mule deer migratory patterns are also being disrupted due to campers and their dogs. Our current policies are not addressing this and foresters say their hands are tied and there is nothing they can do. Please focus all your efforts on solutions. Change policies and hire more staff to hold people accountable for destroying our public lands. Thank you!
