Comments: Your analysis that clear cutting is currently not a threat to OG forests, is not correct. I live in Coos County and for the past 2+ months loggers have been cutting just down the road. The log trucks start around 4 a.m. and haul most of the day. Most of the dead trees on the trucks I have witness are >21" diameter. I am furious that BLM is sanctioning this devastation to a national heirloom: our diverse OG forests. See pix.
