Comments: The existence of and continuation of leases for the cabins in question are totally in conflict with the very concept of a preserved wilderness area. Please do the right thing and see that the leases are not renewed and cabins are removed as they should be from a wilderness area that is a true national treasure; one which should not be usurped by a few at the expense of so many. I have been to the wilds of Alaska enjoying its beauty and doing my best to leave no evidence of my presence, that is how a wilderness area should be experienced.
