Title:

Comments: Attached is a map showing the 10.5-miles of Sugar Pine Spring Water pipeline right-of-way. The pipeline is buried between 2 to 4 feet deep. Generally, an air-relief-valve (ARV) manhole is located at its high points. A detail description of each USFS road crossing was provided as a comment to the Rim Fire salvage logging project. Please confirm you have located that information. If you have any questions or comment do not hesitate to contact me. - Regards, Scott Fahey
