First name: Claudia

Last name: Trueblood

Organization: New Mexico Environment Department

Title:

Comments: The New Mexico Environment Department (NMED) offers a favorable opinion of the Peloncillo FireScape project based on the draft environmental assessment and encourages coordination with NMED's Smoke Management Program regarding any planned burning activities to ensure those activities meet desired air quality and air monitoring conditions. NMED also recommends heeding the recommendation of NMED's Surface Water Quality Bureau (SWB) regarding buffers and permits.
