Comments: A little background, I have been visiting Sweetwater Lake Resort since 1991 and have had the pleasure to work for AJ Brink Outfitters from 1995-2006. Sweetwater is a part of my history more so than any other place.

My initial feedback is that this plan is too much for Sweetwater. The beauty of Sweetwater is that it is truly a diamond in a rough that should stay that way. While change is a constant in the world outside of Sweetwater, keeping it as much as it use to be should be the goal.

The other beauty of the Sweetwater is the community that has supported throughout the years. This place should remain a place for the local community to enjoy and cherish as well as those that wander up a county road. Any thought of placing this on the reservation systems takes away from that discovery. The local community should also be able to meet and celebrate at Sweetwater as they always have.

My vote would be for less campgrounds, no RV waste stations, and more natural beauty. I also believe that the horses should be closer as they have been one of the biggest attractions here since I can remember.

I appreciate the opportunity to provide feedback and I am happy to answer any additional question.

Thanks!
