First name: Susan

Last name: Conner

Organization:

Title:

Comments: We need old-growth trees more than we need technological fixes for climate chaos. They do more good for the environment than solar, wind, EVs or anything else. Nature-based solutions are the way to go. Be as strong and courageous as possible to fight off anyone who wants to destroy old trees and forests. We can get wood products from plantations. Your job is to protect and preserve these precious ecosystems.
