Comments: Hi Adam,

We are in favor of the ladder fuel reduction on Jackson Mtn. Our property touches the forest at [redacted]. I do think there has been enough logging in the area and would like to see that come to a close. However, there is a tree on the forest side that is leaning over the fence and could possibly be a ladder for fire into our trees and if it falls may reach our house. It's the tree on the far left. It would be good if that one could be harvested.

Thanks,
