Title:

Comments: I recently attended the informational meeting in Cooke City regarding this project and appreciate the information given. That said, few details as to a timeline were available. I am concerned about the soil stability above my home and have in the past 40 years experienced major mud slides at my home which have closed Bannock Trail. During the few winters we were able to spend time here, we went to sleep to the sound of avalanches coming off of Wallrock. The trees protected us from any major damage. The area between my home and Wallrock sports a vast system of wildlife trails which I would hate to see disrupted. I'm impressed by your effort to save our white bark pine. I'm not looking forward to the noise and road wear of logging trucks. I spend my summers here hoping for peace and tranquility. We lived through the fires of 88. I would very much appreciate notification when work is to begin in my area.
