Comments: I'm generation Jones cishet and m, seriously dude, is everything in this country all about profit valued more than anything else? Anyhoo here is my comment on saving the O.G. trees. To our United States Department of Forestry , I urge you to never stray from prioritizing the preservation of old growth timber in all of our forests, to halt logging in these critical ecosystems (old growth forests) to preserve biodiversity, combat climate change and to ensure the long term health of our forests for generations to come.

Thank you,

Call me with questions 413-672-7233

I don't have any testimony nor data so I've attached a salient meme relative to our govt unfortunately. I put the meme between 2 pics of a rose bush in our backyard. Peace.
